Response & Prevention Branch  
U.S. Environmental Protection Agency  
Region II, Woodbridge Avenue  
Edison, New Jersey 08837

Subject: Removal Ferrous Sulfate Salt Crystals  
Nelson Galvanizing, Inc.

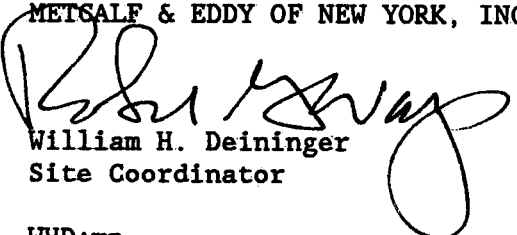

Dear Mr. Kahn:

As indicated in our meeting of April 23, 1991, Nelson Galvanizing made arrangements with Nappi Trucking to have a roll-off container on-site on Tuesday, April 30, 1991, to consolidate the Ferrous Sulfate material. The consolidating of the material allows for additional space for staging of the remaining materials as well as completion of the material inventory.

We have contacted Mr. Foo Suhawong from Jersey Miniere to obtain written confirmation of acceptance of the Ferrous Sulfate. The acceptance of the material will be based upon the results of the TCLP and RCRA analysis results as well as visual inspection of a composite sample.

If you have any questions or comments please contact me at (914) 631-7273.

Very truly yours,  
METCALF & EDDY OF NEW YORK, INC.
